Skyler Brown   The project

- On the homepage I have a slideshow gallery
- 2 HTML5 video tags
- 1 canvas tag used to transition between grey-scale (JQuery animation)

- On the Contact us overlay I have a canvas to use Google maps
  (JQuery animation for the overlay)

I chose to do this site because Brad's Car Tunes is my Uncle's store. He has a website but it is very outdated and needs to be updated. Some of the requirements for the assignment I will end up taking off in the end but I included them for the assignment. All images and videos were given to me by my uncle to use for this project. Ultimately I decided to do this for him because it is good practice and will be a good portfolio piece for employment opportunites.
